

## What do you think is the best action in this situation?

It looks like we are possibly one move away from a win; if we choose the right one, and get some fair dice. (They don't even need to be in our favor for several of these choices; just standard percentages will win it.)

Lots of good choices:

1. Assault in the Center vs. H5
2. Armor Assault vs. H5
3. Behind Enemy Lines vs. h4
4. BEL vs. i4, either destroying, or forcing a retreat to gain the second fortress and

it's VP.
