

How to Track Your Wins

Your War Room is your command record. It brings together battle results, win percentages, campaign progress, ribbons, achievements, and military rank. Each After Action Report adds another chapter to your history as a commander.

STEP 01

Review Your Personnel Record

Start with the **Personnel Record**. This section identifies the player whose record you are viewing and shows your current military rank, Combat Points, and recorded battle count.

The **Rank Progression** display shows your place along the military rank path, including earlier ranks and the ranks ahead. It also shows your progress toward the next promotion.

Combat Points and promotions follow the site's configured reward rules. Your Personnel Record gives you a quick way to see how your command career is developing.

STEP 02

Choose Your Battle

Scroll to **Submit After Action Report**.

Use the **Campaign / playthrough** menu to select a saved campaign or choose a standalone battle. Then use the **Battle / scenario** menu to select the scenario you played.

For campaign battles, select the correct campaign and scenario so the report can be connected to your campaign progress. A standalone battle still becomes part of your battle history.

STEP 03

Complete Your After Action Report

Enter the details of your completed battle:

- **Battle Format:** Select Standard, Overlord, or Breakthrough.
- **Side played:** Choose Allies or Axis.
- **Date played:** Enter the date of the battle.
- **Allied medals / points:** Enter the Allied score.
- **Axis medals / points:** Enter the Axis score.
- **Opponent:** Optionally record who you played.
- **Battle notes:** Optionally describe your strategy, turning points, or lessons learned.

Enter both scores accurately. The War Room calculates victory or defeat from your selected side and the scores you provide.

Use your notes to capture a successful maneuver, a costly mistake, or something you want to try differently next time.

STEP 04

Submit the Report

Click **Submit After Action Report** to save the battle.

The report becomes part of your permanent battle history. The debrief beneath the form summarizes the saved result and any rewards recorded for that submission.

For a qualifying campaign battle, the report also updates the connected campaign tracker. Replaying a completed campaign scenario adds another battle to your history without replacing its existing campaign result.

STEP 05

Review Your Battles and Win Rates

The **Recent Battles** table displays your latest 10 recorded battles. Review the scenarios, sides, results, and scores from your recent command decisions.

Two percentages appear beside the heading:

- **Overall Wins:** Your win percentage across your full recorded War Room battle history.
- **Last 10 Battles:** Your win percentage across your 10 most recent recorded battles.

If you have fewer than 10 recorded battles, the recent percentage uses the battles available. Both percentages count wins against all battles in the relevant group, including draws.

Compare the two figures to see whether your recent performance is improving relative to your overall record.

STEP 06

View Your Campaign Ribbons

Click **View Campaign Ribbons** to expand your ribbon display. Click it again to collapse the section.

The progress text beside the button shows how many ribbons you have earned from the campaigns included in your active campaign record.

Inside the expanded section, you can see earned ribbons and campaigns still in progress. Ribbons recognize completed campaigns rather than individual victories.

Submitting campaign AARs keeps the connected campaign tracker moving forward. Campaign completion is then recognized through the campaign ribbon system.

STEP 07

View Your Achievements

Click **View Achievements** to open your Service Record. Click it again to collapse the section. The summary beside the button shows your earned achievements in each tier:

- **Bronze:** Early milestones in your command career.
- **Silver:** Growing experience and battlefield distinction.
- **Gold:** Advanced accomplishments and sustained performance.
- **Elite:** Long-term milestones and exceptional achievements.

Each card explains its requirement and shows **Locked**, **In progress**, or **Earned**. Earned cards may also show the award date.

AARs supply evidence for accomplishments such as your first report, battle totals, victories, and specialist experience. Automatic updates depend on the site's connected achievement rules. The supplied achievements plugin automatically recognizes **First Blood**; other achievements require their corresponding integrations or verified awards.

STEP 08

Follow Your Growth as a Commander

These sections tell different parts of the same story.

Your **AARs** record what happened. Your **Recent Battles** and win percentages show your performance. Your **campaign progress and ribbons** show operations completed. Your **achievements** recognize particular milestones. Your **Personnel Record** shows your rank and Combat Point progression.

After each battle, submit an accurate AAR and review the updated record. Over time, your War Room becomes a record of the experience, decisions, and accomplishments that shape your growth as a commander.
